

3D perception CompacView 3DP DHD800

A brief introduction to the 3D perception CompacView 3DP DHD800. The DLP projector has an HDTV 1920 x 1080 resolution and a contrast of 7500:1. The integrated lens shift gives freedom when positioning the projector. Thanks to the brightness of 9000 Ansi lumens, a picture width of 964 cm is possible. The projector will also create slightly brighter rooms with a smaller image width (we recommend max. 643 cm). In the event that the image is still too small, the projector offers integrated edge blending software, with which several projectors can project a large image together. The model is also Full HD 1080P compatible. Even projection onto the ceiling is possible thanks to the 360° projection. This model is no longer offered by 3D perception.
