A brief introduction to the IBM MicroPortable. The DLP projector has an XGA 1024 x 768 resolution and a contrast of 400:1. The projector can illuminate images up to 289 cm wide thanks to its 1100 Ansi lumens. In room light, however, the image width should ideally be less than 193 cm. It is no longer offered by the manufacturer IBM, but is still a very popular projector.
