ANKER COSMOS

The Anker Cosmos model is a DLP LED projector with HDTV 1920 x 1080 resolution and a contrast of 1000:1. Thanks to the LEDs, the projector has a light life of up to 30,000 hours, which is over 20.5 years if enjoyed for four hours a day. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. The projector can illuminate a picture width of 305 cm well. However, if there is room light, the picture width should ideally not exceed 203 cm. Furthermore, the projector can play 1080P without any problems. On the market since 2020, the model is no longer offered by the manufacturer Anker.
