

# Anker Nebula Astro

ANKER NEBULA ASTRO

A brief introduction to the Nebula Astro: The Anker game-portable LED DLP projector offers 100 Ansi lumens, a contrast of 400:1 and a WVGA 854 x 480 resolution. The manufacturer Anker specifies a service life of 30,000 hours, which converts to over 20.5 years at 4 hours per day. Due to the brightness of 100 Ansi lumens, a picture width of 102 cm is possible. In room light, the picture should be max. 68 cm wide. Thanks to the built-in 3250 mAh 3.63V battery, no power supply is required, allowing the projector to be set up quickly and flexibly. Even 1080P video signals are no problem for the projector. The operating noise of just 30 decibels makes the projection quiet. It was launched in 2020 and is no longer offered by the manufacturer Anker, but is still a popular projector in our database.
