

Anker Nebula Mars 3 Air

ANKER NEBULA MARS 3 AIR

The Nebula Mars 3 Air LED DLP has 400 Ansi lumens and an HDTV 1920 x 1080 resolution. Thanks to the LEDs, the projector has a light life of up to 30,000 hours, which is over 20.5 years if enjoyed for four hours a day. Built-in horizontal and vertical keystone correction provides freedom when positioning the projector. 203 cm image width the projector will illuminate well. However, if room light is available, the image width should ideally not exceed 135 cm. Thanks to the built-in rechargeable battery, the projector does not require a power supply for 5 hours, so it can be set up spontaneously and easily anywhere. Thanks to the integrated Android TV software, it offers direct access to a variety of streaming services such as Netflix, Disney+, Amazon Prime Video and YouTube as well as games and other interactive content. The model recognizes Chromecast, screen mirroring signals, so it is possible to play videos with high resolution and surround sound directly via Wi-Fi from a smartphone, tablet or PC (Android, Windows and iOS). Another extra is that the projector can be connected to external wireless speakers using the Bluetooth function. Playing 1080P is also no problem for the projector.
