

Anker Nebula P1i

ANKER NEBULA P1i

Brief Introduction

Beta 2.5

The Anker Nebula P1i Micro portable LED LCD projector features 400 ANSI lumens, a contrast ratio of 1500:1, and an HDTV resolution of 1920 x 1080. Thanks to its LEDs, the projector has a light source lifespan of up to 30,000 hours, which equates to over 20.5 years at 4 hours of use per day. The projector is equipped with a built-in media player, so playing files directly is no problem. Horizontal and vertical keystone correction provides flexibility during setup. The 400 ANSI lumens allow for an image width of up to 174 cm. However, if there is ambient light in the room, the image should be no wider than 116 cm. With Google TV, the projector becomes a versatile media hub that can be seamlessly integrated into a smart home. In addition, thanks to its Bluetooth functionality, the projector can be flexibly paired with other speakers. Furthermore, the projector can play 1080p content without any issues. Compared to other models, the projector is very quiet, with an operating noise level of 29 decibels.
