A brief introduction to the Nebula Prizm II: The Anker LED LCD projector offers 200 Ansi lumens, a contrast of 1500:1 and HDTV 1920 x 1080 resolution. Manufacturer Anker specifies a service life of 30,000 hours, which is over 20.5 years if enjoyed for four hours a day. Horizontal and vertical keystone correction makes setting up the picture childs play. The projector can illuminate images up to 144 cm wide thanks to its 200 Ansi lumens. In room light, however, the image width should ideally be less than 96 cm. Playing 1080P is also no problem for the projector. The projector was launched in 2019 and is no longer sold by the manufacturer.
