

Appotronics AL-MK625

The stationary AL-MK625 3D laser DLP projector from Appotronics has 6200 Ansi lumens, a contrast of 100000:1 and a UHD (4K2K) 3840 x 2160 resolution. The manufacturer specifies a laser service life of 20000 hours, which would be over 13.7 years with a daily viewing time of 4 hours. The integrated lens shift gives freedom when positioning the projector. An image width of up to 800 cm is possible as the projector has 6200 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 533 cm. In the event that the image is still too small, the projector offers integrated edge blending software, with which several projectors can project a large image together. Furthermore, it is Full HD 1080P and 4K as well as 3D compatible, meaning that all currently available Blu-ray formats can be recognized by the projector.
