

Appotronics AL-MU625

APPOTRONICS AL-MU625

With the AL-MU625, manufacturer Appotronics offers a DLP laser projector with WUXGA 1920 x 1200 resolution and a contrast of 100000:1. The manufacturer specifies a laser service life of 20000 hours, which is over 13.7 years if enjoyed for four hours a day. The projector also offers a lens shift function for flexible projection adjustment without loss of quality. An image width of up to 800 cm is possible as the projector has 6200 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 533 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. Playing 1080P and 3D is also no problem for the projector. Even projection onto the ceiling is possible thanks to the 360° projection.
