- 1800 ANSI lumens Brightness
- XGA (1024 x 768) Resolution
- 4.9 kg/10.8 lbs.

ASK

Easy to set-up XGA Resolution High Brightness Brilliance Easy to use Superb performance for the discerning user Vivid colors

IMPRESSION A10+ to operate whisper quiet at 38 dB, and with a low-profile 118-mm case so it doesn't intrude between you and your audience. The ASK IMPRESSION A10+ can be ceiling mounted or used for rear projection as easily as it can be placed on a desktop.

Trouble-free

You shouldn't have to worry about your projector; it should simply work when you need it. That's why we used a 150W Ultra High Performance (UHP) lamp in the IMPRESSION A10+ -which means you get high brightness throughout the lamps' 2000 hour life. If you need to replace the lamp, you can easily do so yourself.

Easy to Set-up

All you have to do is connect the power cord and the signal cable. The IMPRESSION A10+ will do the rest, search for sources, adjust the image and make all sources fit the screen. The settings and your user preferences are automatically stored in the projector's 40-source memory. The IMPRESSION A10+ will recall your settings the next time you use it. The IMPRESSION A10+ provides USB, MS Serial mouse, IBM PS/2 and MAC ADB compatibility for automatic mouse set-up.

ASK IMPRESSION A10+

When you want your message to shine brightly, the ASK IMPRESSION A10+ is for you. With 1800 ANSI lumens high brightness, excellent image quality and simplicity of operation, the IMPRESSION A10+ will help you put your message across. Do you want to use it in several locations? The top model of the award winning ASK IMPRESSION series, it is lighter and smaller than traditional desktop projectors, yet gives you great performance and features.

Superb Performance

True XGA resolution and perfect scaling

between VGA and SXGA ensures

sharp, detailed images and wide compatibility. With high contrast and clear colors, the ASK IMPRESSION A10+ can be used virtually anywhere, spanning from professional presentation rooms to locations where the ambient lighting cannot be controlled. The ASK IMPRESSION A10+ is an excellent long-term technology investment for you and your company.

Stealth projector

We expect you want your audience to concentrate on your message - not your projector. Moreover, we want to provide you with a quiet and pleasant meeting room environment. So we designed the

Easy to Operate

The on-screen menu system resembles the look and feel of the common Windows® environment, so you don't have to learn a new user interface. Moreover, you can choose between nine different languages for the menus. For maximum convenience, all functions on the projector can be accessed both from the projector's keyboard and from the BatMouse III remote control. You can simultaneously connect up to two computer sources and two video sources to the IMPRESSION A10+. In addition, all cables are standard. Should you lose one you can buy a new cable in any electronics or computer store. We even included a monitor outlet so you can keep your face towards your audience in a classroom or lecture hall.

Fully compatible

So you wouldn't need to worry about compatibility, we did. The ASK IMPRESSION A10+ can be connected to sources

with extreme resolutions and signal frequencies, thanks to a system bandwidth of up to 150 MHz. The result is excellent stability, clarity and image quality. The ASK IMPRESSION A10+ has true 1024 x 768 resolution LCD modules with Micro Lens Array, and using the latest image processing technology

can show film-like image quality in 1280 x 1024 resolution. down 640 x 480 and video resolutions.

You should not simply take our word for the excellence of this projector, of course.

Read the technical specifications and then try it out. We think the IMPRESSION A10+ will convince you. The IMPRESSION A10+ is not just our brightest projector; it's a bright choice!

Carrying Case

Ceiling Mount

UHP Lamp

4.9 kg

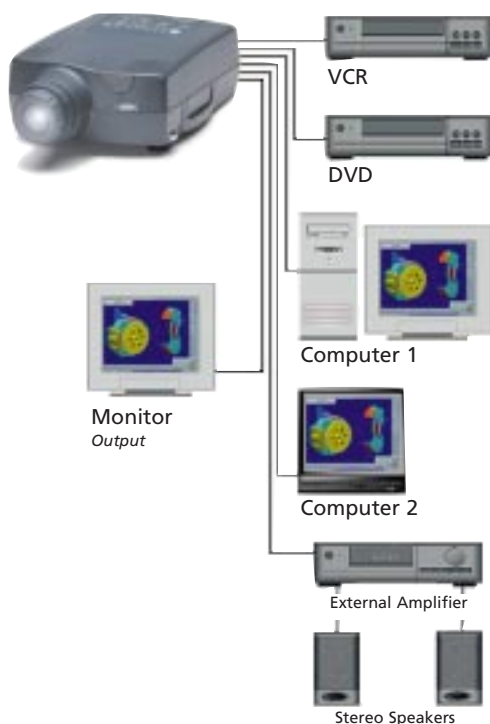

The design of the IMPRESSION A10+ ensures superb functionality and a unique presentation. The ultra low cabinet design measures only 118 mm high, putting it well out of audience view in any situation.

Fully automatic set-up; the user must only connect the power and signal cables, and the projector will handle the rest.
