

ASK Proxima E3815

Brief Introduction

Beta 2.5

A brief introduction to the E3815: The ASK Proxima stationary DLP projector offers 8100 Ansi lumens, a contrast of 6000:1 and an XGA 1024 x 768 resolution. The integrated lens shift provides freedom when positioning the projector. 8100 Ansi lumens ensure that a picture width of 784 cm is also possible. The projector creates rooms with residual light with a smaller image width, we recommend a maximum of 523 cm. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Even 1080P video signals are no problem for the projector. Even projection onto the ceiling is possible thanks to the 360° projection. The model built in 2013 is no longer offered by ASK Proxima.
