With the GP2, manufacturer Benq offers a DLP LED projector with WXGA 1280 x 800 resolution and a contrast of 2400:1. The manufacturer specifies an LED service life of 20000 hours, which converts to over 13.7 years at 4 hours per day. The projector also offers an integrated media player that can be used to play files directly. Thanks to the brightness of 200 Ansi lumens, a picture width of 144 cm is possible. In room light, the picture should be max. 96 cm wide. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. Furthermore, the projector can play 1080P without any problems. With an operating noise of just 29 decibels, the model is very quiet compared to others. It was launched in 2012 and is no longer offered by the manufacturer Benq.
