Christie's unique split-body design revolutionizes the world of Digital Cinema projection. The separate projection head and ballast lets you put very high power in almost any projection room configuration. The universal ballast gives you maximum flexibility.

Revolutionary design, purpose-built functionality – projection perfection.

Christie CP2000X Specifications

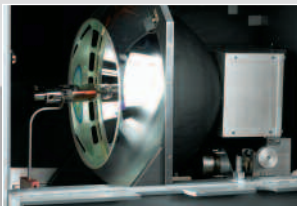

The pinnacle of 3-chip DLP Cinema™ projection technology

Separate, small, variable output ballast has no ripple, reducing flicker – ideal for post-production.

Christie's Touch Panel Controller (TPC™) provides system set-up and control of the projector via the Ethernet, from virtually anywhere.

Christie's LiteLOC™ technology enables constant screen brightness throughout the lifetime of the lamp.

Setting new standards with 2K resolution and up to 21,000 ANSI lumens, the Christie CP2000X delivers spectacular presentations from next-generation DLP Cinema™ technology, high-quality optics and 15-bit image processing. Experience exceptionally crisp and clean images with perfect color saturation in every show.

Offering the ultimate in networkability, on-board ChristieNET™ connectivity lets you control as many units as you want from virtually anywhere.
