

CineVersum LV-WX9K

CINEVERSUM LV-WX9K

The CineVersum LV-WX9K 3D LCD projector has 8500 Ansi lumens, a contrast of 1600:1 and a WXGA 1280 x 800 resolution. The lamp in the projector is specified with a lamp life of 4000 hours, which is over 5.5 years if enjoyed for two hours every day. The built-in lens shift and keystone correction function provides freedom when setting up. 937 cm image width, the projector will be able to illuminate well. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 625 cm here. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. The HDMI MHL (Mobile High-Definition Link) port allows 1080p / 60 Hz image mirroring (screen mirroring) to be transmitted from the smartphone while it is being charged at the same time via the connection. Furthermore, the projector can play 1080P without any problems and can even project Blu-rays onto the ceiling thanks to 360° projection. On the market since 2019, the model is no longer offered by the manufacturer CineVersum.
