

Digital Projection HIGHlite Laser II WUXGA 3D

Brief Introduction

Beta 2.5

The HIGHlite Laser II WUXGA 3D laser DLP projector from Digital Projection has 13000 Ansi lumens, a contrast of 2000:1 and a WUXGA 1920 x 1200 resolution. Thanks to the laser technology, the projector has a light life of up to 20000 hours, which is over 13.7 years if enjoyed for four hours a day. With the lens shift function, the projector can be positioned very freely. The projector can illuminate a picture width of 1158 cm well. Rooms with residual light can be created by the projector with a smaller image width, we recommend a maximum of 772 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. The projector can also play 1080P and 3D without any problems. This model is no longer offered by Digital Projection.
