

Epson USA PowerLite L210W

EPSON USA POWERLITE L210W

A brief introduction to the Epson USA PowerLite L210W. The standard portable LCD laser projector has a WXGA 1280 x 800 resolution and a contrast of 2500000:1. The manufacturer claims a laser life of 20000 hours, which is over 13.7 years with four hours of use per day. The projector also offers an integrated media player that can be used to play files directly. Thanks to the horizontal and vertical keystone correction, the projector can be positioned very freely. An image width of up to 682 cm is possible as the projector has 4500 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 455 cm. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. As the projector recognizes screen mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. The model is also Full HD 1080P and 3D compatible. Even projection onto the ceiling is possible thanks to the 360° projection.

Brief Introduction Beta 2.5
