

ETOE Dolphin

Brief Introduction

Beta 2.5

The Dolphin LED DLP projector from ETOE has 500 ANSI lumens, a contrast ratio of 1000:1, and HDTV 1920 x 1080 resolution. The manufacturer specifies an LED service life of 30,000 hours, which equates to over 20.5 years of enjoyment at four hours per day. The ambient light sensor allows the projector to automatically optimize the projected image. The projector also offers an integrated media player that allows files to be played directly. A built-in horizontal and vertical keystone correction provides freedom when setting up the projector. The projector can illuminate a picture width of 227 cm. However, if there is ambient light in the room, the image width should not exceed 151 cm. Thanks to the built-in battery, the projector does not need a power supply for 5 hours, allowing it to be set up spontaneously and easily anywhere. The integrated Google Assistant turns the projector into a hub in your smart home, combining voice control and a wide range of functions. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. The model recognizes Chromecast, Airplay, and Miracast screen mirroring signals, making it possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). In addition, Bluetooth connectivity is a useful addition to the projector, especially for wireless audio transmission. The model is also compatible with Full HD 1080P and 4K (compressed). With only 23 decibels of operating noise, the model is already very quiet compared to others.
