HISENSE M2 PRO

Brief Introduction

Beta 2.5

The Hisense M2 Pro is a DLP laser projector with UHD (4K2K) 3840 x 2160 resolution and a contrast ratio of 1000:1. Manufacturer Hisense specifies a lifespan of 25,000 hours, which would equate to over 17.1 years at 4 hours per day. The built-in ambient light sensor (Ambient Light Sensor) detects ambient light in the room and automatically optimizes the image. The projector also features a built-in media player that allows you to play files directly. An image width of up to 366 cm is possible. However, in well-lit rooms, the image should be set to a smaller size. We recommend a maximum of 244 cm. The projector supports AirPlay and Miracast screen mirroring, which allows you to stream high-resolution videos and surround sound from smartphones, tablets, and PCs running Android, Windows, or iOS. In addition, thanks to its Bluetooth functionality, the projector can be flexibly paired with other speakers. The projector also has no trouble playing 1080p, 4K, and 3D content, meaning it can recognize all currently available Blu-ray formats. At just 28 decibels, the device is among the quieter projectors.
