The PL1SE 3D laser DLP projector from Hisense has 2100 Ansi lumens, a contrast of 2000:1 and a UHD (4K2K) 3840 x 2160 resolution. It is a laser projector with 25000 hours of light life, which is over 17.1 years with a daily viewing of 4 hours. Includes an integrated media player that can be used to play files directly. As it is a short-throw projector, the projector can be placed very close to the wall. For a 2 m wide picture, the projector only needs to be 50 cm away from the screen. As the projector recognizes Airplay and screen mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via WLAN. Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Furthermore, it is Full HD 1080P and 4K as well as 3D compatible, meaning that all currently available Blu-ray formats can be recognized by the projector.
