

Hisense Vidda LightGo+

HISENSE VIDDALIGHTGO+

The Vidda LightGo+ Laser DLP projector from Hisense has 1,260 ANSI lumens, a contrast ratio of 30,000:1, and an HDTV resolution of 1,920 x 1,080. Thanks to the laser, the projector has a lifespan of 30,000 hours, which would equate to over 20.5 years at 4 hours of use per day. Since Hisense specifies the projector's brightness in lumens, we've calculated an approximate ANSI-lumen value in this case. The projector will be able to adequately illuminate a screen width of 361 cm. However, if there is ambient light in the room, the screen width should ideally not exceed 241 cm. Thanks to the built-in 20,000 mAh battery (2.5 hours of video, 5.2 hours of audio), no external power source is required, allowing the projector to be set up quickly and flexibly. The projector supports AirPlay and Miracast screen mirroring, which enables high-resolution video and surround sound to be streamed via Wi-Fi from smartphones, tablets, and PCs running Android, Windows, or iOS. In addition, the Bluetooth capability is a useful feature for the projector, especially for wireless audio transmission. The model is also compatible with Full HD 1080p and 4K (compressed).
