

Hitachi LP-WU6700

HITACHI LP-WU6700

A brief introduction to the LP-WU6700: The Hitachi stationary 3D laser DLP projector offers 7000 Ansi lumens, a contrast of 20000:1 and a WUXGA 1920 x 1200 resolution. The manufacturer specifies a laser service life of 20000 hours, which is over 13.7 years with a daily viewing time of 4 hours. The integrated lens shift gives freedom when positioning the projector. The projector can illuminate images up to 850 cm wide thanks to its 7000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 567 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. With the HDMI MHL port, the smartphone image can be transferred to the projector in Full HD at 60 Hz by screen mirroring and the smartphone is charged at the same time. Playing 1080P is also no problem for the projector, and it even has the option of projecting HD 1080P Blu-rays onto the ceiling thanks to 360° projection. The model built in 2018 is no longer offered by Hitachi.
