

InFocus IN1049

INFOCUS IN1049

A brief introduction to the IN1049: The InFocus standard portable 3D LCD projector offers 4600 Ansi lumens, a contrast of 50000:1 and a WUXGA 1920 x 1200 resolution. The lamp of the projector is specified with a lamp life of 20000 hours, which converts to over 27.4 years at 2 hours per day. The projector also offers an integrated media player that can be used to play files directly. Built-in horizontal and vertical keystone correction provides freedom when positioning the projector. 4600 Ansi lumens ensure that a picture width of 689 cm is also possible. The projector creates rooms with residual light with a smaller image width, we recommend a maximum of 459 cm. The model is also compatible with Full HD 1080P and 4K (compressed) as well as 3D, meaning that all currently available Blu-ray formats can be recognized by the projector.
