

InFocus INL4129

INFOCUS INL4129

With the INL4129, manufacturer InFocus offers a DLP projector with WUXGA 1920 x 1200 resolution and a contrast of 2000000:1. The built-in lens shift and keystone correction function provides freedom in projection adjustment. The model offers a microphone jack plug and 10W speakers, so no additional audio equipment is required for presentations or training courses. 5600 Ansi lumens ensure that a picture width of 760 cm is also possible. The projector manages rooms with residual light with a smaller image width, we recommend a maximum of 507 cm. Playback of 1080P and 4K (compressed) as well as 3D is also no problem for the projector, meaning that all Blu-ray formats currently on offer can be recognized by the projector. At 30 decibels, the projector is very quiet compared to other projectors.

1 x 0,67" DLP Chip
