With the LS700, manufacturer InFocus offers a standard portable LCD projector with XGA 1024 x 768 resolution and a contrast of 300:1. The projector can illuminate an image width of up to 230 cm with its 700 Ansi lumens. In room light, however, the image width should ideally be less than 153 cm. The projector is no longer sold by the manufacturer. It should also be noted that, unfortunately, there are no more replacement lamps for the projector, neither originals nor replicas.
