Jmgo Picoplay

Brief Introduction Beta 2.5	The Picoplay at a glance: The Jmgo 3D LED LCD projector offers 500 ANSI lumens and HDTV 1920 x 1080 resolution. The manufacturer specifies an LED service life of 30,000 hours, which would be equivalent to over 20.5 years at 4 hours per day. Since Jmgo specifies the brightness of the projector in lumens, we have calculated an approximate ANSI lumen value in this case. The projector will be able to illuminate a 227 cm image width well. However, if there is ambient light in the room, the image width should not exceed 151 cm. The built-in 20,000 mAh (74 Wh) battery means that no power supply is required, allowing the projector to be set up quickly and flexibly. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. Since the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. Another extra feature worth mentioning is that the projector can be connected to external wireless speakers via Bluetooth. It is also Full HD 1080P compatible.
Display Type	1 x LCD Panel HDTV 16/9 Liquid Crystal Display
Ansi-Lumen	Projector: 500 / 400 ISO Lumen — Screen: 222 Lux (200 cm Screen width)
