**D-ILA**

# IMPROVED PICTURE QUALITY

DLA-X90R 120,000:1

DLA-X70R 80,000:1

DLA-X30 50,000:1

HOME **4K** THEATRE

ADVANCED **3D** QUALITY

## DLA-X90R

Available in November 2011

Glossy black finish body

Native contrast  
120,000 : 1

**THX<sup>®</sup>3D**  
DISPLAY

## DLA-X70R

Available in November 2011

Glossy black finish body

Native contrast  
80,000 : 1

**THX<sup>®</sup>3D**  
DISPLAY

## DLA-X30

Available in November 2011

Matt black finish body

Matt white finish body

Native contrast  
50,000 : 1

## 2012 D-ILA QUALITY

### EVOLUTION OF BASIC PICTURE QUALITY

Review of the optical components and design improves brightness.

i.e. More than 50% up DLA-X30 with 3D picture mode and 2D/D65 setting

### INDUSTRY HIGHEST NATIVE CONTRAST

New Enhanced Pure Wire Grid and new optical construction control the light and minimize the leaking

On top of basic picture quality improvement, we have upgraded features in new line-up

**4K PRECISION**  
for 2D playback

PIXEL SHIFT PROJECTION TECHNOLOGY

NEWLY DEVELOPED SCALING TECHNOLOGY

**ADVANCED 3D ENTERTAINMENT**

BRIGHTNESS UP

EASY OPERATION

2D-to-3D CONVERSION

VARIOUS ADJUSTMENTS

**STEP UP EASE OF USE**

LENS MEMORY

NEW PIXEL ALIGNMENT

UPGRADED SCREEN ADJUST

and more...

4K

3840 x 2160

4K  
3840x2160

HIGH RESOLUTION  
4 x FULL HD

Full HD  
1920x1080

JVC Scaling and projection technology

# 4K

3840 x 2160

e-Shift technology  
enables 4K projection  
by 2K device

Newly developed pixel shift  
device makes it possible to  
project 4K 2K precision by using  
0.7inch Full HD D-ILA device

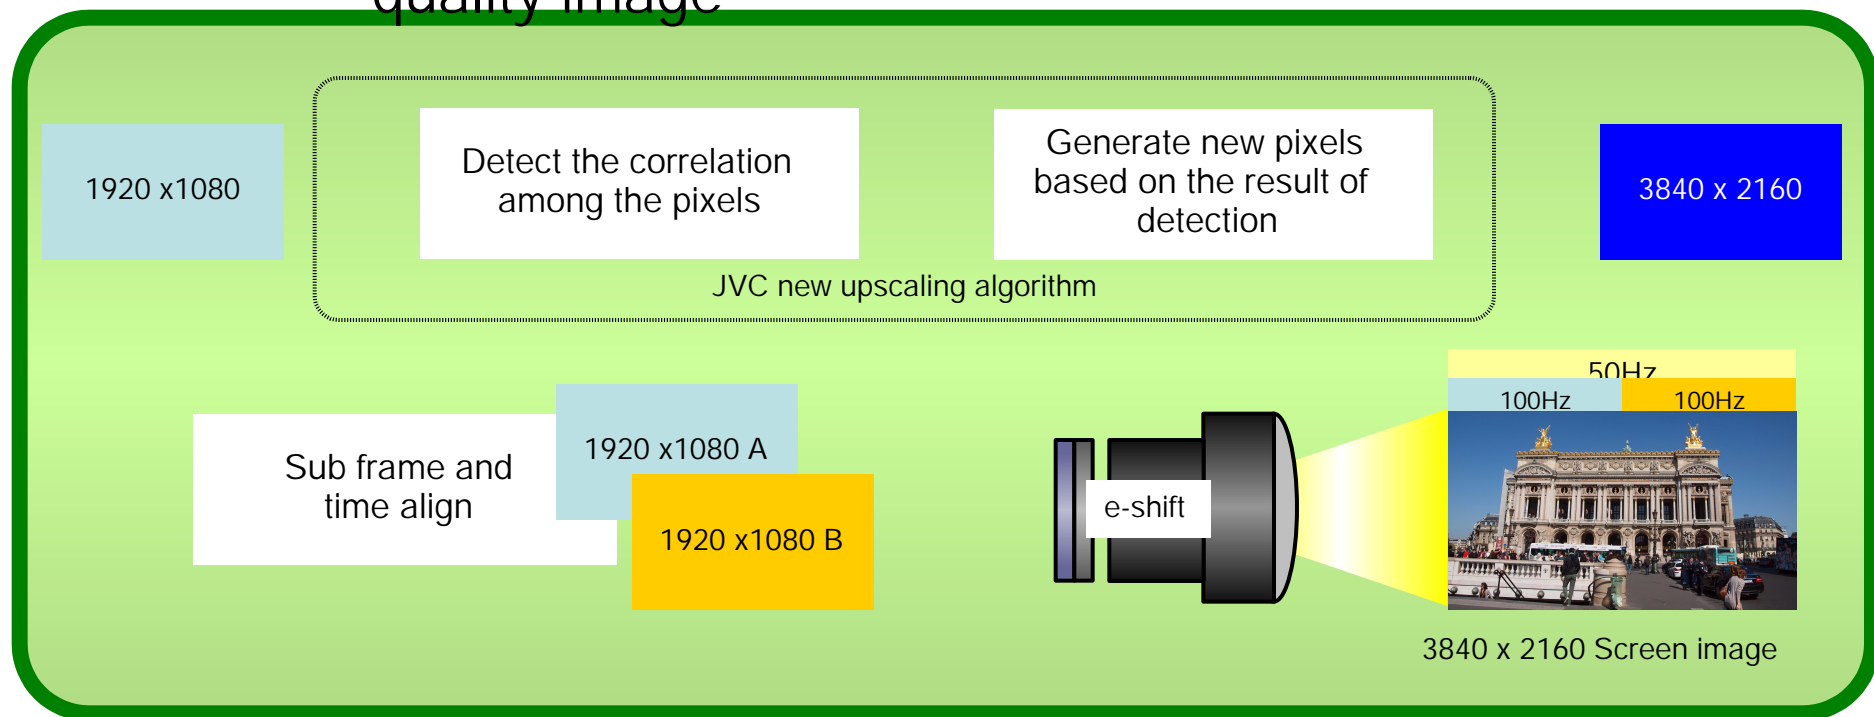

NEW D-ILA optical unit

# 4K

3840 x 2160

Newly developed signal scaling system makes real 4K 2K quality image

## Note:

1. 4K playback is for 2D source only. 3D content is projected at Full HD resolution.
2. All 2D signals (from DVD, Blu ray, set top box or server, etc) are automatically up-converted to 4K precision
3. As the projector is designed for home theatre use, 4096 x 2160 material, which is available on a very limited basis, are not accepted.

Conventional upscaling

JVC

ADVANCED 3D ENTERTAINMENT

## Competitor's 240Hz Line addressing

\*Line by line

Addresses each frame line by line. Shutter is only 50% open

Low brightness Dark images

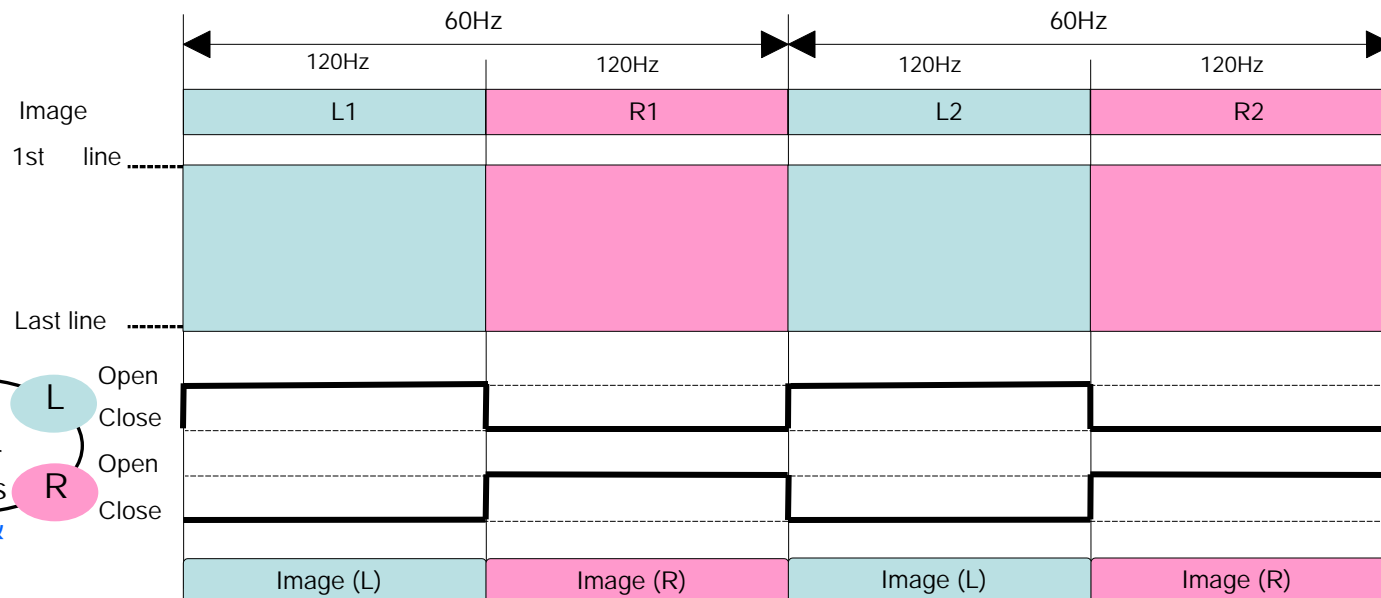

## D-ILA 120Hz Frame addressing

\*100% frame at one time

100% frame addressed at one time, no wasting of time

High brightness Clear & vivid images

# NEW 3D FEATURES

## 2D-to-3D CONVERTER

JVC's original 2D-to-3D conversion technology designed for professional business use is now available in the home TV program, DVD/Blu-ray, video shot by camcorders, now all the contents can be converted to 3D with excitement

Depth control

By contents or preference, 3D depth and popping up level can be chosen

Subtitle adjustment

Distorted shape is corrected

LOW

HIGH

Converter

Converter

Subtitle

## CROSS TALK CANCELLER

Analyses left and right pictures and applies a JVC original algorithm. Crosstalk is dramatically decreased without losing picture quality

OFF

ON

## PARALLAX ADJUSTMENT

Parallax adjustment controls right and left pictures horizontally to achieve more suitable and preferable 3D image

LOW

HIGH

## 3D DIRECT KEY ON REMOTE

Direct remote key for easier 3D operation

3D format key is to choose Frame packing, Side-by-side or Top-bottom

3D control key is shortcut to 3D menu OSD to control 2D-3D control, Parallax Adjust etc.

## PK-AG2

Compact rechargeable glasses

WxHxD ( mm ) 182x37x174

Weight 40g

USB charging cable and bag provided

Compatible with JVC 2010 models (DLA-X3, X7 and X9) as well

## PK-EM1

(continues)

## PK-AG1

WxHxD ( mm ) 168x48x165

Weight 56g

Compatible with JVC 2011 models (X30, X70R and X90R) as well

“EASE OF USE” FEATURES

## LENS MEMORY

With 16:9 screen

With 2.35:1  
cinema  
scope size screen

3 lens positions (zoom, focus and shift)  
can be stored and recalled easily

Memory 2

Memory  
1(example) /

Memory 3 (example) /  
2.35 : 1 with subtitle

## NEW PIXEL ALIGNMENT SYSTEM

New alignment system allows much more precise adjustment than before in 1/16 pixel increments

It is also possible to divide a screen by 121 grid and align each grid

The combination of these two alignments allows images without colour fringing

## PREMIUM FEATURE OF DLA-X90R

### 1. USER COLOUR PROFILE

In addition to the preset colour profile, your original colour profile can be created by PC. The created data can be uploaded to the projector through the RJ45 connection. The data stored in USER 1 - 5 can also be stored on the PC through the RJ45 connection.

## PREMIUM FEATURE OF DLA-X90R

### 2. AUTO

**CALIBRATION**  
With generally available colour meters, perfect and easy set up is possible

(1) To adjust for viewing environment

(2) To set and maintain correct white balance

Original

After 1,000 hours

Calibrated

Requires Datacolor Spyder3pro or Spyder3Elite colour meters Required software for PC can be downloaded from the JVC website

## The other improvements from 2010

Model	Feature	2010	2011
ALL	3D Format Side-by-side	1080p@60i/60p/50i/50p/24p	1080p@60i/60p/50i/50p/24p, 720p@50p/60p
ALL	Anamorphic mode	2D only	2D and 3D
ALL	Component terminal	Silver	Gold plated
ALL	Remote Code	1 mode	2 modes (A<->B)
ALL	Sleep timer	Sleep timer	Sleep timer with "power off" alert
ALL	User picture Mode	3 modes	5 modes, mode rename
X70R, X90R	Screen adjust	94 modes	99 modes + additional screen information updatable from web by RJ45 connection
X70R, X90R	Picture Tone	For Film mode only	For all picture modes
X70R, X90R	Dark/Bright level	For Film mode only	For all picture modes

# 2012 Feature list

Embargo release date: 8th September 2011

Model		DLA-X30	DLA-X70R	DLA-X90R
Device		0.7 inch Full HD D-ILA x3		
e- shift		-		
Resolution		1920 x 1080	3840 x 2160 (2D), 1920 x 1080 (3D)	
Lens		x2 Motorized Zoom and Focus		
Lens shift		Vertical 80% Horizontal 34% Motorized		
Lamp		220W UHP		
Brightness		1300lm	1200lm
