

KEJOG M19

KEJOG M19

The KEJOG M19 model is an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 10000:1. The LEDs give it a lifespan of 30,000 hours, which is over 20.5 years of four hours of use per day. The horizontal and vertical keystone correction gives you leeway when setting it up. Since KEJOG indicates the brightness of the projector in lumens, we have calculated an approximate Ansi-Lumen value in this case. The projector can illuminate up to 273 cm of image width well due to the 720 Ansi-Lumen. However, in room light, the image width should ideally be less than 182 cm. The projector has Airplay, Miracast Screen Mirroring support, which makes it possible to play videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS directly via WLAN. In addition, thanks to the Bluetooth function, the projector can be flexibly connected to other speakers. The model is also Full HD 1080P and 4K (compressed) compatible.
