

Leica Cine Play 1

LEICA CINE PLAY 1

The Leica Cine Play 1 model is a DLP laser projector with UHD (4K2K) 3840 x 2160 resolution and a contrast of 1500:1. It is a laser projector with a 25,000-hour light lifespan, which would be 17.1 years with 4 hours of viewing per day. The projector also offers an integrated media player that can be used to play files directly. The projector will be able to illuminate a screen width of 556 cm well. However, if room light is available, the screen width should not exceed 371 cm. The projector has Airplay and Screen Mirroring support, which allows you to play videos in high resolution and surround sound from smartphones, tablets and PCs running Android, Windows or iOS directly over Wi-Fi. In addition, thanks to the Bluetooth function, the projector can be flexibly connected to other speakers. Video signals 1080P and 4K as well as 3D are also no problem for the projector, and thus all currently offered Blu-ray formats can be recognized by the projector. At just 29 decibels, the device is one of the quieter projectors.
