LG PH510P

Brief Introduction

Beta 2.5

The LG model PH510P is a DLP LED projector with HDTV 1280 x 720 resolution and a contrast of 100000:1. Manufacturer LG specifies a service life of 30000 hours, which is over 20.5 years with a daily viewing time of 4 hours. The projector also offers an integrated media player that can be used to play files directly. The projector will be able to illuminate the 238 cm picture width well. If room lighting is available, however, the image width should ideally not exceed 159 cm. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. With the HDMI MHL port, the smartphone image can be transmitted to the projector in Full HD at 60 Hz by screen mirroring and the smartphone is charged at the same time. The projector can also play 1080P without any problems. At just 30 decibels, the device is one of the quieter projectors. It was launched in 2020 and is no longer offered by the manufacturer LG, but is still a popular projector in our database.
