

# Megapower ML70i

MEGAPOWER ML70i

## Brief Introduction

Beta 2.5

The Whiteboard ML70i LED DLP projector from Megapower has 800 Ansi lumens, a contrast of 2000:1 and a WXGA 1280 x 800 resolution. The lifespan of the LEDs is 30000 hours, which is over 20.5 years with a daily viewing time of 4 hours. Includes an integrated media player that can be used to play files directly. 800 Ansi lumens ensure that a picture width of 287 cm is also possible. However, if room light is available, the picture should be a maximum of 191 cm wide. The projector also offers a whiteboard function that makes training and presentation rooms interactive. With the HDMI MHL port, the smartphone image can be transmitted to the projector in Full HD at 60 Hz by screen mirroring and the smartphone is charged at the same time. The model was built by Megapower in 2016 and is no longer current, but is still one of the most popular projectors.
