- Amazing in small rooms thanks to wide-angle lens
- Shooting star with lots of special features
- Elegance that'll keep people talking for days

Empowered by Innovation NEC

Home cinema

Imagine the fun you'll have at home! With the VT47's Oscar-winning performance, you can always choose whether to hold your sides for laughter, hold your breath for anxiety or hold your tears for those emotional moments.

You'll give our cinema king VT47 the highest awards.

Romantic comedy, sizzling thrillers, gladiators fighting to the death... whatever films turn you on, the new VT47 is the star you need for getting started in the breathtaking new world of home cinema.

Jump on the couch... turn on your VT47... 3-2-1 start! Even in the opening credits, you'll see that the VT47 takes top awards – hands down.

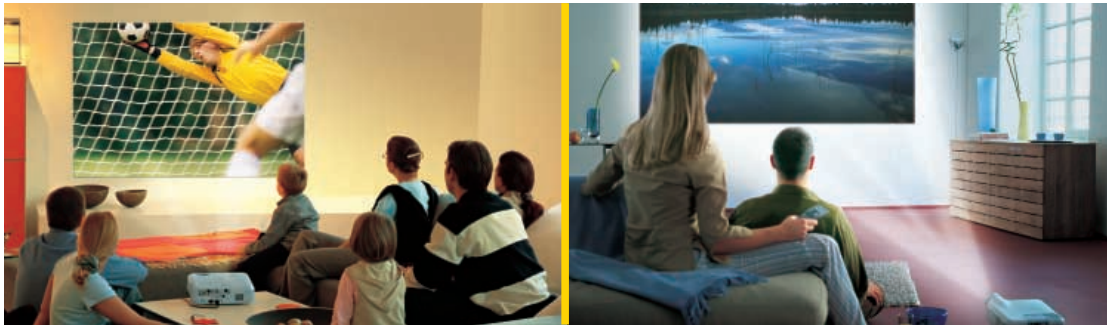
Covers all roles.

Turn on your new VT47 – and turn your living room into the cinema of your dreams.

Brilliant: your next private showing.

Images so sharp, colorful and full of contrast – you'll forget you're not at a movie theater. Performance that's so good, it can throw pictures with an image diagonal of maximum 7.62 meters.

And with 1,500 ANSI Lumens, you and your friends will enthusiastically watch films even in rooms which aren't darkened. The VT47 is the ideal start to your private cinema.



A soloist... or a double agent.

The perfect character for your home cinema... or the top specialist for your company... or why not both? The new VT47 fascinates everyone. Don't try and resist – just hire him!

The VT47 is absolutely trouble-free – continuous use guaranteed. How? Its service package, which in addition to a 3-year warranty provides customer-friendly on-site service.

Save yourself the tiring search for new talent; abandon that laborious casting: the supreme mix of top performance and affordability has already made the VT47 a superstar.

Pure magic: brilliant, super-sharp pictures.

A true event – either for your living room or your next business presentation: the VT47 puts 1,500 ANSI Lumens to work for you. Its 400:1 contrast and 800 x 600 native resolution (SVGA) provide extraordinarily brilliant colors, crystal clear precision and extremely sharp focus. And thanks to modern color management, colors can be individually adjusted.

The best way to a top experience: the automatic and manual vertical Keystone Correction always makes images right-angled.

Your tiny and handy companion: the VT47 remote control.

Its motto: as silently as possible.

When the thrill mounts in your film or your business presentation takes your audience's breath away – the VT47's super-quiet 28 dB make it almost inaudible.

A giant – even in mini rooms.

The VT47 enables you to project from as little as 58 cm away from your screen. In this case, you get a 63 cm image diagonal. If your VT47 is 2.57 meters away from the screen, however, you get an amazing 2.7 meter image diagonal. Its wide-angle lens lets it throw enormous images even in very small rooms. And its freeze-image function and digital zoom let you look at individual images in the greatest possible detail.

A transformation artist – no matter what wall you look at.

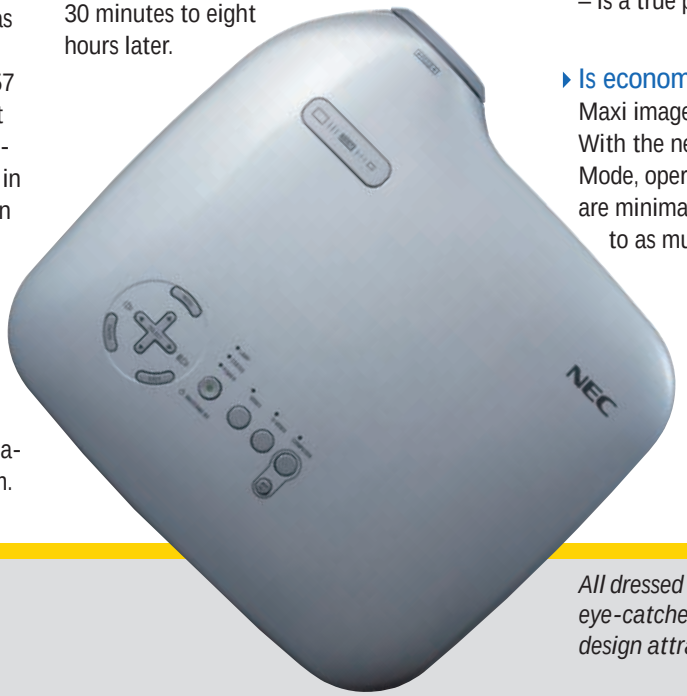
Tonight – premiere on your cream-colored living room wall; tomorrow morning – presentation in your completely white conference room.

Your VT47 goes along with all program changes. Its 7 x manual color correction function lets it rapidly adapt to different projection surfaces.

Automatic stop after your movie marathon.

Improbable – but not impossible! Suppose you can't keep your eyes open after your midnight double-feature...

For this and similar situations, the off-timer function lets you program your VT47 in advance to turn off automatically from 30 minutes to eight hours later.



All dressed up for your business or as an eye-catcher at home – the VT47's new, elegant design attracts attention wherever it is.

Action hero who's uncomplicated as well.

Plug&Play, operation so easy a child could do it, intuitive user guidance, effortless control of all projector functions – and then a double security function as an encore... Your new VT47 makes everything ultra-easy.

To mention only two of its highlights: you can select the desired input source with the buttons on the projector's top. And the VT47 answers each of your actions with a signal tone, so that you are always in the know. And by the way, its functional on-screen menu – with 21 languages – is a true polyglot.

Is economy one of your constant worries?

Maxi images, but mini power consumption? With the new VT47, you can have both. In Eco Mode, operating costs and energy consumption are minimal. And this mode increases lamp life to as much as 3,000 hours.

Business

Extremely efficient.

In meetings, workshops and all types of other opportunities, the VT47 will not only excite your team – but you as well.

As a gifted show talent, the VT47 demonstrates its star qualities in the business arena as well.

Your competent professional – who doesn't even need pin-stripes.

It's high time to recruit the versatile projection and presentation expert who holds up under stress. Your perfect applicant isn't far away.

Bring the new VT47 into your company and get ready for one positive surprise after another.

Brilliant, sharp, quiet as they come and a true lightweight at only 2.9 kg; can be used for the widest range of applications and operated without any high-tech knowledge at all. Your VT47 is an out-performer who will soon be your entire company's favorite colleague.

Grade: "Superior" – in all details.
