

Nec MT1065

NEC MT1065

A brief introduction to the Nec MT1065. The standard portable LCD projector has an XGA 1024 x 768 resolution and a contrast of 800:1. The integrated media player allows files to be played directly. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. A picture width of up to 493 cm is possible. However, the image should be smaller in room light. We recommend max. 329 cm. Furthermore, the projector can play 1080P without any problems. The projector was launched in 2002 and is no longer sold by the manufacturer.

Brief Introduction
