Manufacturer NothingProjector offers the Projector One Smart, an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast ratio of 1500:1. The manufacturer specifies an LED lifetime of 30,000 hours, which would be over 20.5 years if viewed for 4 hours a day. Since the projector has horizontal and vertical keystone correction, it can be set up with plenty of space in the room. 300 ANSI lumens ensure that an image width of 176 cm is also possible. However, if there is room lighting, the image should be no more than 117 cm wide. Thanks to Google TV, the projector can be conveniently controlled by voice command. Since the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. Another extra feature worth mentioning is that the projector can be connected to external wireless speakers via Bluetooth. It is also compatible with Full HD 1080P and 4K (compressed).
