OPTOMA ZU606T-B

The Optoma model ZU606T-B is a DLP laser projector with WUXGA 1920 x 1200 resolution and a contrast ratio of 2000:1. Manufacturer Optoma specifies the service life as 20,000 hours, which is over 13.7 years when used for four hours a day. As the projector has horizontal and vertical keystone correction, it can be set up with plenty of space around it. The model offers a microphone jack plug and 10W speakers, so no additional audio equipment is required for presentations or training courses. An image width of up to 787 cm is possible; if the image width is smaller (we recommend max. 525 cm), even rooms with residual light are no problem. The HDMI MHL (Mobile High-Definition Link) port allows 1080p/60 Hz image mirroring (screen mirroring) from a smartphone while it is being charged via the connection. Furthermore, the projector can play 1080P and 4K (compressed) as well as 3D without any problems, meaning that all currently available Blu-ray formats can be recognized by the projector. This model is no longer available from Optoma.
