

Panasonic PT-RCQ10

PANASONIC PT-RCQ10

The stationary PT-RCQ10 3D laser DLP has 10000 Ansi lumens, a contrast of 10000:1 and a 4KESHIFT 2716 x 1528 4,150,048 pixel resolution. It is a laser projector with 20000 hours of light life, which is over 13.7 years with four hours of use every day. Includes a lens shift and keystone correction function, which provides freedom during installation. An image width of up to 1016 cm is possible as the projector has 10000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 677 cm. Video signals 1080P and 4K as well as 3D are also no problem for the projector, meaning that all Blu-ray formats currently available can be recognized by the projector. The model built in 2019 is no longer offered by Panasonic.
