

Panasonic PT-RQ100

PANASONIC PT-RQ100

The stationary Panasonic PT-RQ100 laser DLP projector has 10000 Ansi lumens, a contrast of 10000:1 and a UHD (4K2K) 3840 x 2160 resolution. The manufacturer specifies a laser service life of 20000 hours, which is over 13.7 years if enjoyed for four hours a day. Including a lens shift and keystone correction function, which provides freedom during installation. An image width of up to 1016 cm is possible as the projector has 10000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 677 cm. Video signals 1080P and 4K are also no problem for the projector. Even projection onto the ceiling is possible thanks to the 360° projection. The model built in 2019 is no longer offered by Panasonic.
