

Philips PicoPix Micro 2

A brief introduction to the PicoPix Micro 2: the Philips Micro-portable LED DLP projector offers 150 ANSI lumens, a contrast of 600:1 and a WVGA 854 x 480 resolution. The manufacturer Philips states a lifespan of 30,000 hours, which is over 20.5 years at four hours of use per day. A screen width of up to 124 cm is possible. However, the image should be smaller if viewed in a well-lit room. We recommend a maximum of 83 cm. The built-in 3000 mAh battery means that no power supply is required, allowing the projector to be set up quickly and flexibly. The projector optionally has screen mirroring support, which makes it possible to play videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS directly via Wi-Fi. Furthermore, it is Full HD 1080P compatible. This model was built by Philips in 2021 and is no longer up to date, but it is still a popular projector in our database.
