Features

Screen Mirroring

The Sharp XV 330H LCD projector has 670 Ansi lumens, a contrast of 100:1 and a resolution. As Sharp specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. The projector can illuminate a screen width of up to 225 cm well with its 670 Ansi lumens. In room lighting, however, the picture width should ideally be less than 150 cm. It is no longer offered by the manufacturer Sharp. It should also be noted that there are unfortunately no longer any replacement lamps available for the projector, neither originals nor replicas.
