

Sharp XV 350H

SHARP XV 350H

Brief Introduction

Beta 2.5

A brief introduction to the Sharp XV 350H. The LCD projector has a resolution and contrast of 100:1. As Sharp specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. An image width of up to 230 cm is possible. In room light, however, the image should be smaller. We recommend max. 153 cm. The projector is no longer sold by the manufacturer.
