S O N N O C S N P - L U 7 5 K C

A brief introduction to the SNP-LU75KC: The Sonnoc Stationary 3D Laser DLP projector offers 7700 ANSI lumens, a contrast of 3000000:1 and a WUXGA 1920 x 1200 resolution. The manufacturer specifies a laser lifespan of 200,000 hours, which would be 13.7 years with 4 hours of viewing per day. The built-in lens shift and keystone correction function provides freedom when adjusting the projection. The projector can illuminate up to 892 cm of image width well with its 7700 ANSI lumens. The projector can handle rooms with low light, but we would recommend a smaller image width for rooms with more light. Furthermore, the projector can play 1080P and 4K (compressed) as well as 3D without any problems, and thus all currently available Blu-ray formats can be recognized by the projector. With only 30 decibels of operating noise, the model is already very quiet compared to others.
