- Built-in auto calibration

Features

Cinematic 4K clarity with four times the detail of Full HD

SXRD® panel technology featured in our professional cinema projectors delivers native 4K (4096 x 2160) resolution images, with no artificial pixel enhancement. Every detail is clear and natural, without jagged edges or visible pixels.

Very high brightness and contrast

With an impressive 1,800 lumens brightness and spectacular 300,000:1 dynamic contrast range, 4K images are clear with bright highlights and rich, deep blacks — even in well-lit rooms.

Smooth, fluid on-screen action

Coupled with the panel's super-fast response rate, Motionflow™ technology means you'll see every detail with minimal blur — no matter how fast the action.

TRILUMINOS™ Display for wider, more natural colors

Sony's TRILUMINOS™ Display technology accurately reproduces a much broader range of colors than a standard projector system. You'll see the difference with finely-reproduced tones and textures plus greater color purity, depth and realism.

HDR Compatible

Take full advantage of the latest content produced with HDR (High Dynamic Range) for extremely wide contrast with an even higher range of brightness levels.

Support for latest standards

The VPL-VW665ES can project content at up to 60 frames per second (fps) in 4K (at color signal YCbCr 4:2:0 / 8 bit) for even smoother images with superior color and realism. Support for HDCP 2.2 lets you enjoy the latest 4K content services.

Reality Creation upscales movies to 4K³

As well as projecting native 4K content, the VPL-VW665ES upscales your Full HD Blu-ray™ or DVD movie collection to 4K with Reality Creation — Sony's Super Resolution processing technology that enhances lower-resolution content, and even upscales 3D movies to 4K resolution.³

Compatible with 'Mastered in 4K' Blu-ray™

Enjoy a near-native 4K experience with discs 'Mastered in 4K'. It's as close as you can get to the 4K-pixel resolution and expanded color range of the original.

Long-lasting lamp

Up to 6000 hours rated lamp operating life (in Low mode) means simpler maintenance, with fewer lamp swaps and reduced running costs.

Picture position memories

Memorizes up to five zoom lens positions for future viewing. Stored settings can be matched to a movie's aspect ratio, including 16:9 and Cinemascope.

Flexible home installation with wide zoom and shift lens

The powered zoom lens with a 2.1x zoom ratio and wide lens shift range gives greater installation flexibility in any room size, even with high ceilings.

Front-facing fan

With the fan exhaust positioned at the front of the projector, you don't need to worry about wall clearance and room for air inhale/exhaust when installing. This helps maximize throw distance, for the biggest possible projected images.

Built-in auto calibration

Set-up is quick and easy: auto calibration ensures superb pictures without effort.

Industry standard RF 3D² compatible

The projector's built-in RF transmitter synchronizes with any RF 3D² glasses for wider coverage and greater stability, so there's no need for an external transmitter.

3-year limited warranty

All Sony Elevated Standard (ES) projectors enjoy 3-year limited warranties.
