

Utimea Apollo Thor T60 Laser TV

ULTIMEA APOLLO THOR T60 LASER

A brief introduction to the Utimea Apollo Thor T60 Laser TV. The short-throw DLP laser projector has a UHD (4K2K) 3840 x 2160 resolution and a contrast of 4000:1. Manufacturer Utimea specifies a service life of 30,000 hours, which is over 20.5 years if enjoyed for four hours a day. Including an integrated media player with which files can be played directly. Thanks to the short-throw projection ratio of just 0.21:1, the projector is not distracting in the room. For a 2m wide image, the projector only needs to be 42 cm away from the screen. Thanks to the integrated Android TV software, it offers direct access to a variety of streaming services such as Netflix, Disney+, Amazon Prime Video and YouTube as well as games and other interactive content. The integrated Google Assistant extends the functionality of the projector with voice assistant features such as navigation, smart home integration and music streaming. The model recognizes Chromecast, screen mirroring signals, making it possible to play videos with high resolution and surround sound directly via Wi-Fi from a smartphone, tablet or PC (Android, Windows and iOS). Another extra is that the projector can be connected to external wireless speakers using the Bluetooth function. The projector can also play 1080P and 4K without any problems. With an operating noise of just 25 decibels, the model is very quiet compared to others.
