

Valerion StreamMaster Plus 2

VALERION STREAMMASTER PLUS

Brief Introduction

Beta 2.5

The Valerion StreamMaster Plus 2 3D Laser DLP projector has 2,500 ANSI lumens, a contrast ratio of 10,000:1, and a UHD (4K2K) resolution of 3,840 x 2,160. Thanks to its laser technology, the projector has a light source lifespan of up to 25,000 hours, which equates to over 17.1 years at 4 hours per day. The projector is equipped with a built-in media player, so playing files directly will be no problem. Since Valerion specifies the projector's brightness in lumens, we have calculated an approximate ANSI lumen value in this case. With a brightness of 2,500 ANSI lumens, an image width of 508 cm is possible. In room lighting conditions, the image should be no wider than 339 cm. The projector supports Chromecast, AirPlay, and Miracast screen mirroring, allowing for direct playback of high-resolution videos and surround sound via Wi-Fi from smartphones, tablets, and PCs running Android, Windows, or iOS. In addition, thanks to the Bluetooth, the projector can be flexibly paired with other speakers. Furthermore, the projector can play 1080p and 4K content without any issues.
