

VISSPL Smart Projector

Brief Introduction

Beta 2.5

Brief introduction of the VISSPL Smart Projector. The home theater LCD LED projector has an HDTV 1920 x 1080 resolution and 800 Ansi-Lumen. The lifespan is 30,000 hours due to the LEDs, which would be the equivalent of over 20.5 years at 4 hours a day. A screen width of up to 287 cm is possible because the projector has 800 ANSI lumens. However, if room lighting is present, the image should be no wider than 191 cm. The projector supports Airplay, Miracast Screen Mirroring, which makes it possible to play videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS directly via WLAN. Another extra to mention is that the projector can be connected to external wireless speakers via Bluetooth. Video signals 1080P and 4K (compressed) are also no problem for the projector.
