VIVITEK QUMI Q8

The Vivitek Qumi Q8 3D LED BrilliantColor DLP projector has 1000 Ansi lumens, a contrast of 30000:1 and an HDTV 1920 x 1080 resolution. The manufacturer Vivitek specifies a service life of 30000 hours, which is over 20.5 years with a daily viewing time of 4 hours. The integrated media player allows files to be played directly. The horizontal and vertical keystone correction provides leeway when setting up. 1000 Ansi lumens ensure that a picture width of 321 cm is also possible. However, if room light is available, the picture should be max. 214 cm wide. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. A smartphone with MHL connection can be connected directly to the MHL/HDMI port for 1080p / 60 Hz image mirroring (screen mirroring). 1080P playback is also no problem for the projector. It was launched in 2016 and is no longer offered by the manufacturer Vivitek, but is still a very popular projector.
