

VOPLLS VP-I Beamer

A brief introduction to the VOPLLS VP-I projector. The micro-portable LCD LED projector has an HDTV 1920 x 1080 resolution and a contrast of 20000:1. Thanks to the LEDs, the projector has a light life of up to 100,000 hours, which is equivalent to over 68.5 years at 4 hours per day. The integrated media player allows files to be played directly. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. As VOPLLS specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. A picture width of up to 377 cm is possible, as the projector has 1380 Ansi lumens. However, if room light is available, the picture should be max. 251 cm wide. The model recognizes Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Another extra is that the projector can be connected to external wireless speakers using the Bluetooth function. Furthermore, the projector can play 1080P and 4K (compressed) without any problems.
