

XGIMI Titan Noir Max

XGIMI TITAN NOIR MAX

Brief Introduction

Beta 2.5

The XGIMI Titan Noir Max model is a DLP laser projector with UHD (4K2K) 3840 x 2160 resolution and a contrast ratio of 1000000:1 dynamic contrast. The manufacturer specifies a laser life of 30,000 hours, which would be equivalent to over 20.5 years at 4 hours per day. It includes a lens shift and keystone correction function, which provides flexibility during installation. With a brightness of 6250 ANSI lumens, an image width of 803 cm is possible. The projector can also handle slightly brighter rooms with a smaller image width (we recommend a maximum of 535 cm). 1080P and 4K video signals as well as 3D are no problem for the projector, which means that all currently available Blu-ray formats can be recognized by the projector. The operating noise of only 28 decibels makes the projection quiet.

Display Type
