

Xiaomi L1

XIAOMI L1

Brief Introduction

Beta 2.5

A brief introduction to the Xiaomi L1. The LCD LED projector has an HDTV 1920 x 1080 resolution and a contrast ratio of 2000:1. The LEDs give the projector a light lifespan of up to 30,000 hours, which is over 20.5 years at four hours a day. The integrated media player can play files directly. Since the projector has horizontal and vertical keystone correction, it can be set up anywhere in the room with plenty of space. Since Xiaomi specifies the brightness of the projector in lumens, we have calculated an approx. ANSI lumen value in this case. An image width of up to 152 cm is possible because the projector has 224 ANSI lumens. However, if the room is well lit, the image should not be more than 101 cm wide. Thanks to the integrated Android TV software, it offers direct access to a wide range of streaming services such as Netflix, Disney+, Amazon Prime Video and YouTube, as well as games and other interactive content. The model recognises screen mirroring signals, so it is possible to play videos in high resolution and with surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. Another extra worth mentioning is the Bluetooth function, which allows the projector to be connected to external wireless speakers. Furthermore, it is Full HD 1080P and 4K (compressed) compatible. At just 30 decibels, the device is one of the quieter projectors.
