

XNANO HM102

The standard portable HM102 LED LCD projector from XNANO has 300 ANSI lumens, a contrast ratio of 1000:1, and an HDTV resolution of 1920 x 1080. Thanks to the LEDs, the projector has a rated light source lifespan of 30,000 hours, which translates to over 20.5 years at 4 hours of use per day. Thanks to horizontal and vertical keystone correction, the projector can be set up with great flexibility. The projector can effectively illuminate an image width of up to 203 cm. However, if there is ambient light in the room, the image width should ideally not exceed 135 cm. The model supports AirPlay and Miracast screen mirroring, allowing you to stream high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). Additionally, thanks to its Bluetooth functionality, the projector can be easily paired with other speakers. The model is also compatible with Full HD 1080p and 4K (compressed).

Brief Introduction

Beta 2.5
