

Zynix NIX500

ZYNIX NIX500

A brief introduction to the NIX500: The Zynix Micro-Portable LED LCD Projector offers 400 ANSI lumens and an HDTV resolution of 1280 x 720. Thanks to its LEDs, the projector has a specified light source lifespan of 30,000 hours, which would equate to over 20.5 years if used for 4 hours a day. The projector also features a built-in media player, allowing files to be played directly. Built-in horizontal and vertical keystone correction offers flexibility when setting up the projector. Thanks to its 400 ANSI lumens, the projector can effectively illuminate an image width of up to 203 cm. However, in room lighting conditions, the image width should ideally be less than 135 cm. As the projector recognises AirPlay, Miracast and screen mirroring signals, it is possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet or PC (Android, Windows and iOS). Furthermore, thanks to its Bluetooth functionality, the projector can be flexibly paired with other speakers. The projector can also play 1080p and 4K (compressed) without any issues.
